

Sys-Manage

Product sheet

Pricing:

Single Server License :	\$	59,-
20 Server License :	\$	399,-
Unlimited Server License:	\$	1.999,-

Requirements:

Hardware:

- IBM compatible PC
- min. 166 MHz CPU (intel / AMD)
- min. 64 MB RAM

Supported Operating systems:

- Microsoft Windows NT 4 Workstation & Server
- Microsoft Windows 2000 Professional
- Microsoft Windows 2000 Server
- Microsoft Windows 2000 Advanced Server
- Microsoft Windows XP Professional
- Microsoft Windows 2003 Server

COPYRIGHT 1.2

for Windows NT / 2000 / XP / 2003

The ultimate migration tool for network administrators

CopyRight allows the system administrator to copy network shares, files, folders and accounts including their security information. Additionally it is capable of synchronizing the source with the destination, copying only files, that have recently changed and deleting files that do no longer exist at the source.

CopyRight copies even locked / protected files

With CopyRight you can even copy files, that are "normally" not accessible, in the same way it is done by Windows NT's Backup features, allowing you to backup all your files, even those, where the ACL would deny the access.

Integrated Windows Explorer shell extension and command line tool

It is possible to either use the Microsoft Windows Explorer or a command line version in a similar way compared to the usual Xcopy command

Reassigning permissions without copying (ReAcling)

CopyRight can reassign the permissions of existing data without actually copying files.

During this process all users and groups contained in permissions will be changed according to the predefined mapping definition file.

For data migration purposes you can:

- assume identically named users and groups in the source and destination environment
- graphically define which users and groups in the source environment relate to which users and groups in the destination environment
- copy users and groups from the source to the destination
- synchronize users and groups from the source to the destination
